Academic Year – 2021-2022

Preparation of Lesson Plan

“Use for ICT Integrated Technology for Preparation of Lesson Plan”

The IQAC college organized Workshop on “Use for ICT Integrated Technology for Preparation for Lesson Plan” on 27/06/2022 to 02/07/2022. Surmal Narve Assistant Professor Gulab Bai Yadav Smriti Shiksha Mahavidyalaya, Borawan Served as the Resource person and presented on the use of integrated technology

Surmal Narve explained the idea of squeezing even one more thing into an already jam-packed curriculum and teaching day seems daunting, the prospect of having to integrate technology into lesson plans is enough to put some teachers over the edge.

Mr. Narve began the session by explaining technology can be broken into six steps.

STEP 1: ANALYZE THE BENEFITS

You may be able to infuse one of your long-standing lessons with technology, but you must first determine whether doing so will benefit students’ overall achievement. Schools have high standards that their technology curricula must meet, so familiarize yourself with those standards to ensure that your lesson plans meet them.

STEP 2: START BRAINSTORMING

Ideally, you won’t be on your own in developing your project. A team approach (with teachers working either on individual lesson plans or on an integrated, multidiscipline lesson plan) can add megawatts to your collective brainpower, especially if some of those colleagues are experienced technology users.

STEP 3: MAP THE PROJECT

You and your team have selected the ideas, concepts and activities that you want to include in your lesson plan or plans, and you have the information needed to select the hardware, software and skills that will be used to complete the plan’s tasks and produce the end product.

STEP 4: CREATE THE TEACHING TEMPLATE

One of the most difficult tasks in planning a new technology project is to accurately predict how much time it will take. The best way to do that is to create a sample project. This crucial point in the modeling process is not the time to skimp on your investment. In fact, it's probably the most important step toward ensuring the success of a new technology project.

STEP 5: DEVELOP ASSESSMENT TOOLS

With the process still fresh in your mind, it's time to reflect on the skills and information the students will be responsible for demonstrating in their project. Create a rubric to construct a means for performance-based assessment of the students' work. Identify how much weight you'll give to grammar, spelling, content, specific technology skills, layout and presentation.

STEP 6: EVALUATION MODE

Having finished your sample project, it's time to evaluate what worked and what didn't. What resources or technology were missing or unnecessary? What did you learn along the way that you would have liked to have known when you started? Is there any way to streamline the process of using the technology to achieve the lesson's goals or make the project more effective?

He Indeed his session by reflecting on the process, answering these questions and incorporating their answers into the model for your new lesson plan, you'll find that you have the experience to work confidently with your students and cope with future glitches.

The following weblinks were shared with them for reference and planning the learning objectives for each lesson:

Workshop on

"BLOOM'S TAXONOMY OF LEARNING OBJECTIVES" -

A General Session on Bloom's Taxonomy of Educational Objectives was organized for B.Ed. students on 15/07/2021. Manoj Kaushle, Assistant Professor of, Gulab Bai Yadav Smriti Shiksha Mahavidyalaya, Borawan served as the speaker. He began the session by explaining how the term taxonomy is applied to classify educational objectives. He differentiated the term 'goals' from 'objectives' with suitable examples. He introduced the three domains of educational objectives in his presentation. He explained the categories of each domain with examples from different subject areas. He elaborated on the ways of writing educational objectives using key action words for each of the cognitive domains. He ended his session by giving examples of educational objectives for all the categories of the cognitive domain for the different pedagogy subjects.

TRAINING SESSION FOR

"USING BLOOM'S TAXONOMY OF WRITE EFFECTIVE LEARNING OUTCOMES"

A General Session on Bloom's Taxonomy of Educational Objectives was organized for first year B.Ed. students on 05/11/2022. Manoj Kaushle, Assistant Professor of Gulab Bai Yadav Smriti Shiksha Mahavidyalaya, Borawan served as the speaker. He began the session by explaining how the term taxonomy is applied to classify educational objectives. He differentiated the term 'goals' from 'objectives' with suitable examples. He introduced the three domains of educational objectives in her presentation. He introduced the three domains of educational objectives in her presentation. He explained the categories of each domain with examples from different subject areas. He aborted on the ways of writing educational objectives using key action worse for each of the cognitive domains.

Mr. Manoj Kaushle explained the revised Bloom's taxonomy educational objectives. He also introduced Digital Bloom's Taxonomy with example for each category of the cognitive domain. He ended her session by giving an online quiz on Bloom's Taxonomy of Educational Objectives.
